(701) 877-282-2700 and ask for the  
"ND/SD Society of Orthodontists" room block.  
Must reserve rooms by February 26, 2019

Dr. Mike Ragan operates a private practice in Dallas, Texas. In 1997, Dr. Ragan graduated with honors from the Baylor College of Dentistry in Waco, Texas. He received his post-graduate training in Orthodontics from Nova Southeastern University in Ft. Lauderdale, Florida, where he served as Chief Resident.

Dr. Ragan is a guest lecturer and past alumni president at Nova. He is a member of a number of professional associations including: Baylor's Odontological Honor Society, the American Association of Orthodontists, and the Southwestern Society of Orthodontists.

#### **SAGITTAL FIRST: The New Movement in Orthodontics**

Dr. Ragan is charting new territory with the ground-breaking SAGITTAL FIRST™ Philosophy. Correcting the Class II or Class III malocclusion at the beginning of treatment, when patients are most compliant, provides greater efficiencies, shorter treatment times, and long-term aesthetics. Dr. Ragan will show how using Carriere Motion 3D™ Appliances to correct the AP, reposition the mandible, and expand the airway, reduces average treatment times to 12 months or less. His ground-breaking clinical results will challenge your views on the traditional practice workflow.

Dr. Ragan will also review the necessary steps to incorporate the SAGITTAL FIRST Philosophy into your practice. Practical tips will be shared and you will be given a unique opportunity to measure and bond a Motion 3D Appliance.

#### **Learning objective**

#### **Upon completion of this lecture you will:**

- Recognize the benefits of the correcting the AP at the beginning of treatment
- Realize the treatment efficiencies related to the SAGITTAL FIRST™ Philosophy
- Challenge your view of the traditional orthodontic workflow
